Databases

INTRODUCTION TO SQL

Izzy WeberCurriculum Manager, DataCamp

Course goals

- 1. Understand databases and their structure → Chapter 1
- 2. Extract information from databases using SQL → Chapter 2

Introducing databases

patrons

card_num	name	member_year	total_fine
54378	Izzy	2012	9.86
94722	Maham	2020	0
45783	Jasmin	2022	2.05
90123	James	1989	0

books

id	title	author	genre	pub_year
638	Being Mortal	Atul Gawande	Non-Fiction	2015
912	Educated	Tara Westover	Non-Fiction	2018
322	Night	Elie Wiesel	Non-Fiction	1956
156	Where the Wild Things Are	Maurice Sendak	Childrens	1963

checkouts

id	start_date	due_date	card_num	book_id
567	2022-05-13	2022-05-27	54378	638
568	2022-06-10	2022-06-24	54378	322
569	2022-06-27	2022-07-11	45783	156
570	2022-08-14	2022-08-28	90123	912

Introducing databases

patrons

card_num	name	member_year	total_fine
54378	Izzy	2012	9.86
94722	Maham	2020	0
45783	Jasmin	2022	2.05
90123	James	1989	0

Relational databases

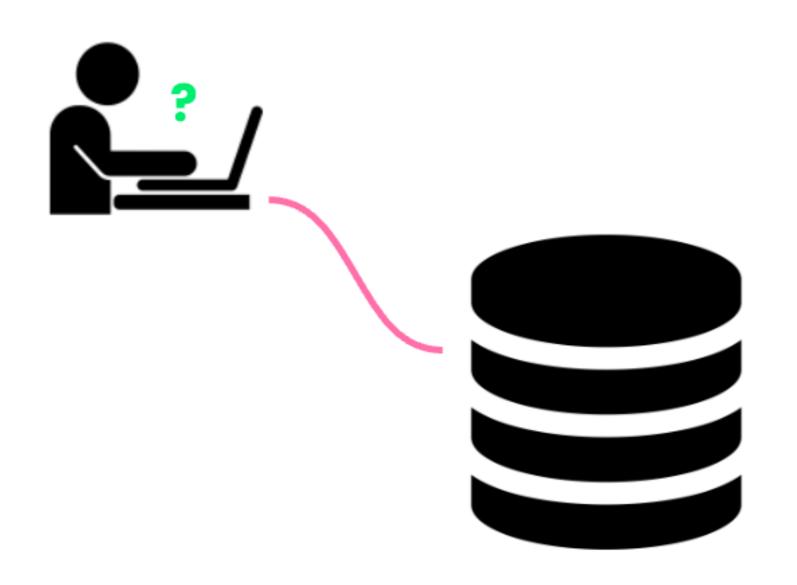

Define relationships between tables of data inside the database

		patrons							
		card_num	name		member_year	total_fine	e		
		54378	Izzy		2012	9.86			
		94722	Maham		2020	0			
		45783	Jasmin		2022	2.05			
		90123	James		1989	0			
				boo	ks				
				id	title		author	genre	pub_year
				638	Being Mortal		Atul Gawande	Non-Fiction	2015
1				912	Educated		Tara Westover	Non-Fiction	2018
\				322	Night		Elie Wiesel	Non-Fiction	1956
\				156	Where the Wild Th	ings Are	Maurice Sendak	Childrens	1963
`	checkouts								
	id start_date	e due_date	card_num	book	c_id				

id	start_date	due_date	card_num	book_id
567	2022-05-13	2022-05-27	54378	638
568	2022-06-10	2022-06-24	54378	322
569	2022-06-27	2022-07-11	45783	156
570	2022-08-14	2022-08-28	90123	912

Database advantages

- More storage than spreadsheet applications
- Storage is more secure

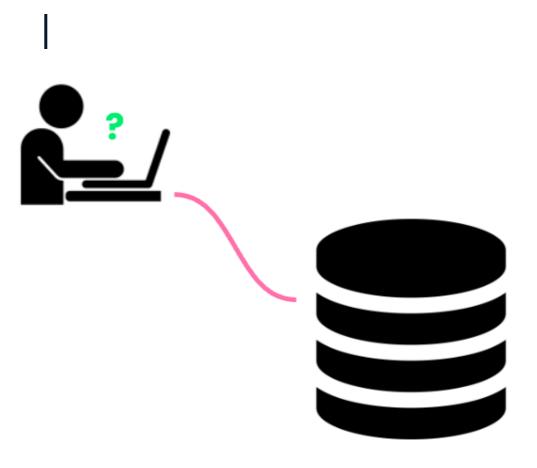

Database advantages

SQL

- Short for Structured Query Language
- The most widely used programming language for databases

```
SELECT *
FROM patrons
LIMIT 30
```

Let's practice!

INTRODUCTION TO SQL

Tables

INTRODUCTION TO SQL

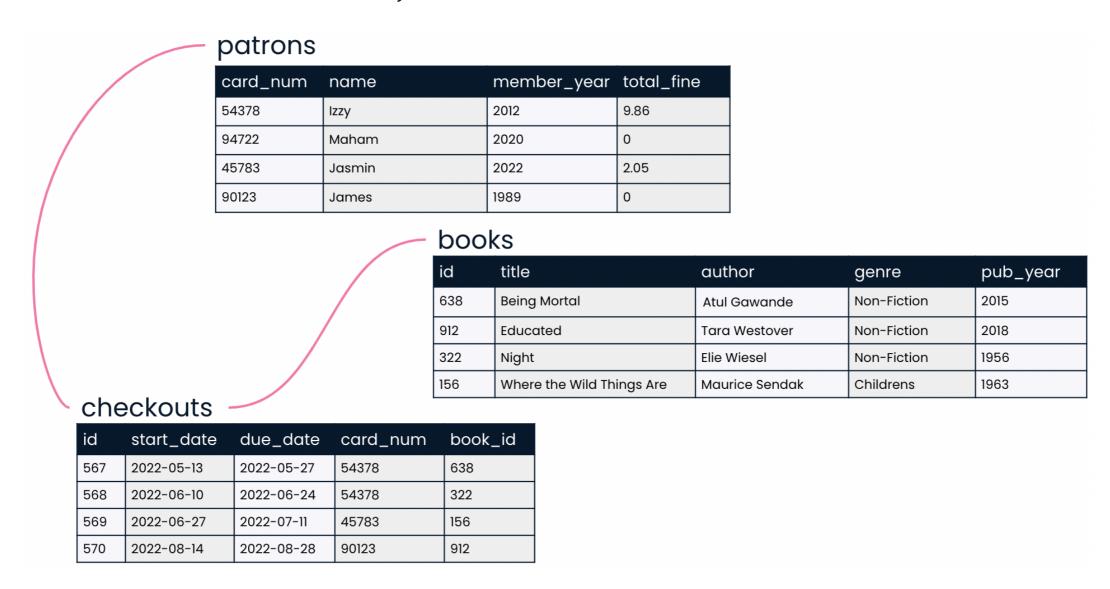

Izzy Weber
Curriculum Manager, DataCamp

A seat at the table

- Table rows and columns are referred to as records and fields
- Fields are set at database creation; there is no limit to the number of records

Good table manners

Table names should...

- be lowercase
- have no spaces—use underscores instead
- refer to a collective group or be plural

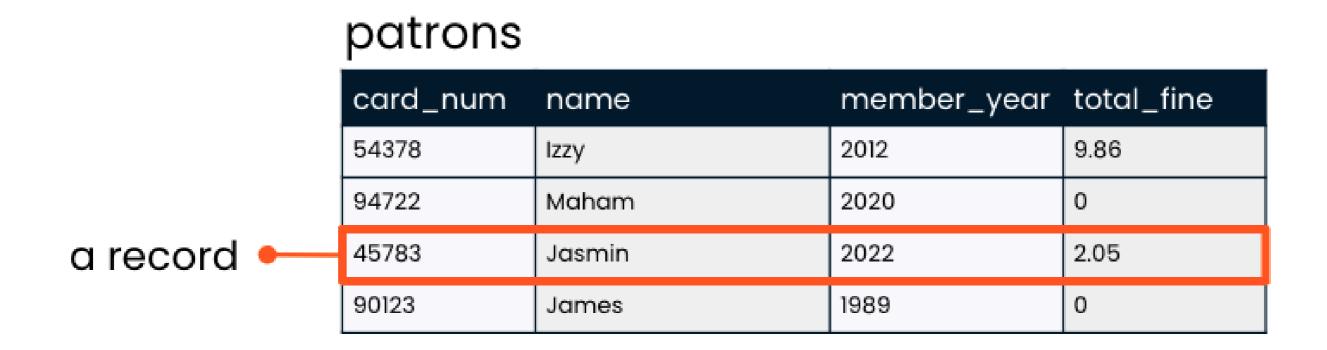

patrons

card_num	name	member_year	total_fine
54378	Izzy	2012	9.86
94722	Maham	2020	0
45783	Jasmin	2022	2.05
90123	James	1989	0

Laying the table: records

A record is a row that holds data on an individual observation

Laying the table: fields

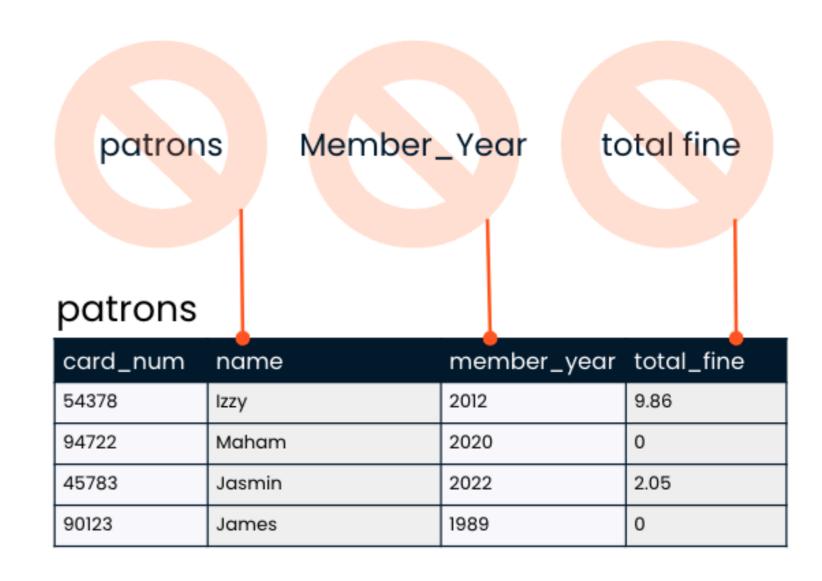

A field is a column that holds one piece of information about all records

More table manners

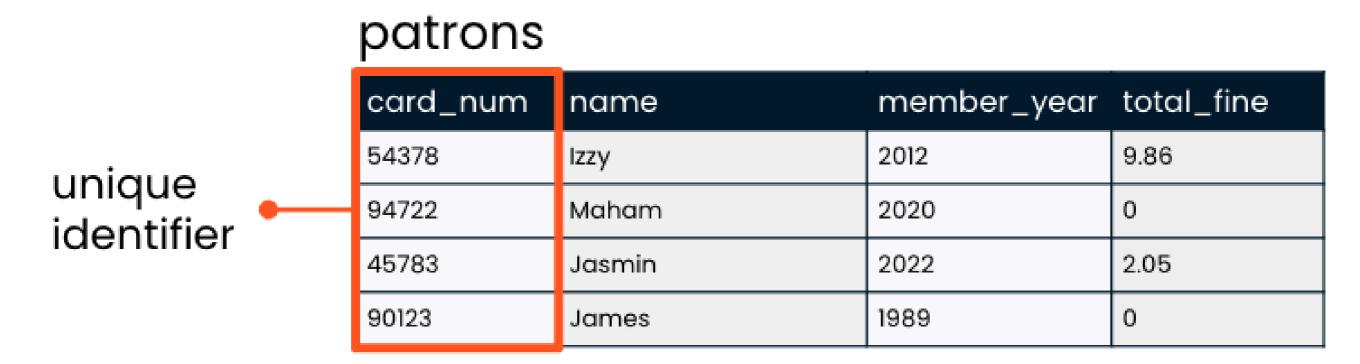

Field names should...

- be lowercase
- have no spaces
- be singular
- be different from other field names
- be different from the table name

Assigned seats

- Unique identifiers are used to identify records in a table
- They are unique and often numbers

The more the merrier

patrons

card_num	name	member_year	total_fine
54378	Izzy	2012	9.86
94722	Maham	2020	0
45783	Jasmin	2022	2.05
90123	James	1989	0

checkouts

id	start_date	due_date	card_num	book_id
567	2022-05-13	2022-05-27	54378	638
568	2022-06-10	2022-06-24	54378	322
569	2022-06-27	2022-07-11	45783	156
570	2022-08-14	2022-08-28	90123	912

patron_checkouts

card_num	name	member_year	total_fine	checkout_id	start_date	due_date	book_id
54378	Izzy	2012	9.86	567	2022-05-13	2022-05-27	638
54378	Izzy	2012	9.86	568	2022-06-10	2022-06-24	322
94722	Maham	2020	0				
45783	Jasmin	2022	2.05	2022-06-27	2022-07-11	45783	156
90123	James	1989	0	570	2022-08-14	2022-08-28	912

Let's practice!

INTRODUCTION TO SQL

Data INTRODUCTION TO SQL

Izzy WeberCurriculum Manager, DataCamp

SQL data types

		all one data type	all one data type	all one data type
all one	patrons			
data type	card_num	name	member_year	total_fine
	54378	Izzy	2012	9.86
	94722	Maham	2020	0
	45783	Jasmin	2022	2.05
	90123	James	1989	0

- Different types of data are stored differently and take up different space
- Some operations only apply to certain data types

Strings

a string field					
patrons					
card_num	name	member_year	total_fine		
54378	Izzy	2012	9.86		
94722	Maham	2020	0		
45783	Jasmin	2022	2.05		
90123	James	1989	0		

- A string is a sequence of characters such as letters or punctuation
- VARCHAR is a flexible and popular string data type in SQL

Integers

	an integer field		
patrons			
card_num	name	member_year	total_fine
54378	Izzy	2012	9.86
94722	Maham	2020	0
45783	Jasmin	2022	2.05
90123	James	1989	0

- Integers store whole numbers
- INT is a flexible and popular integer data type in SQL

Floats

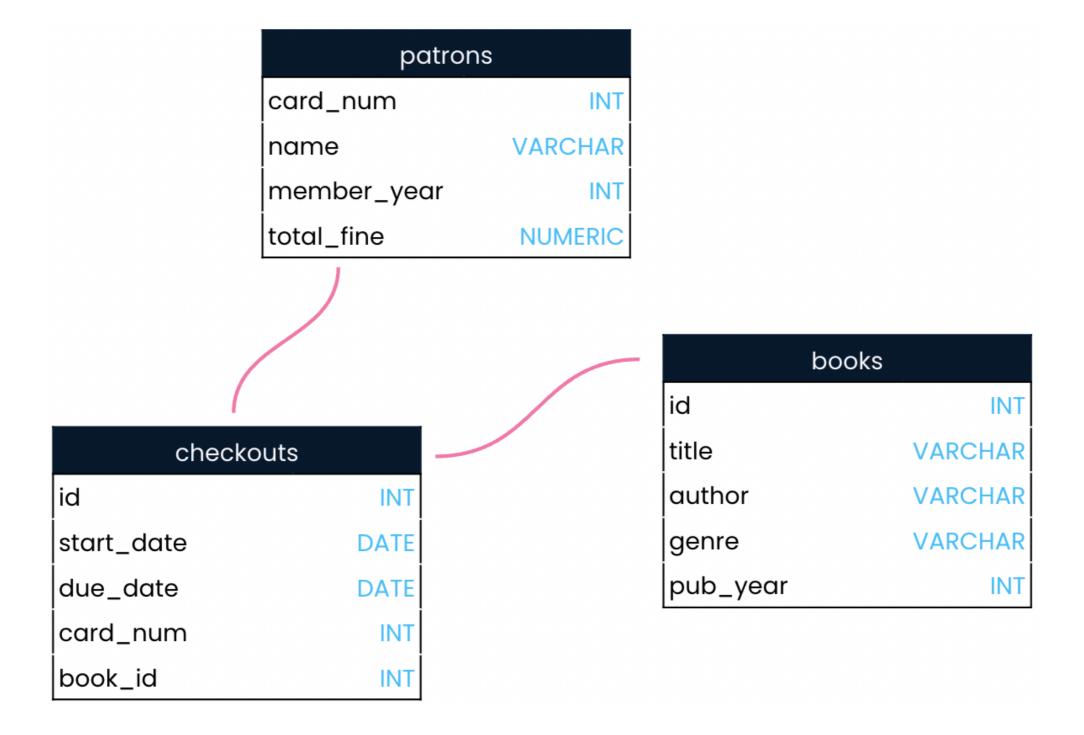

patrons

card num name member year total fine

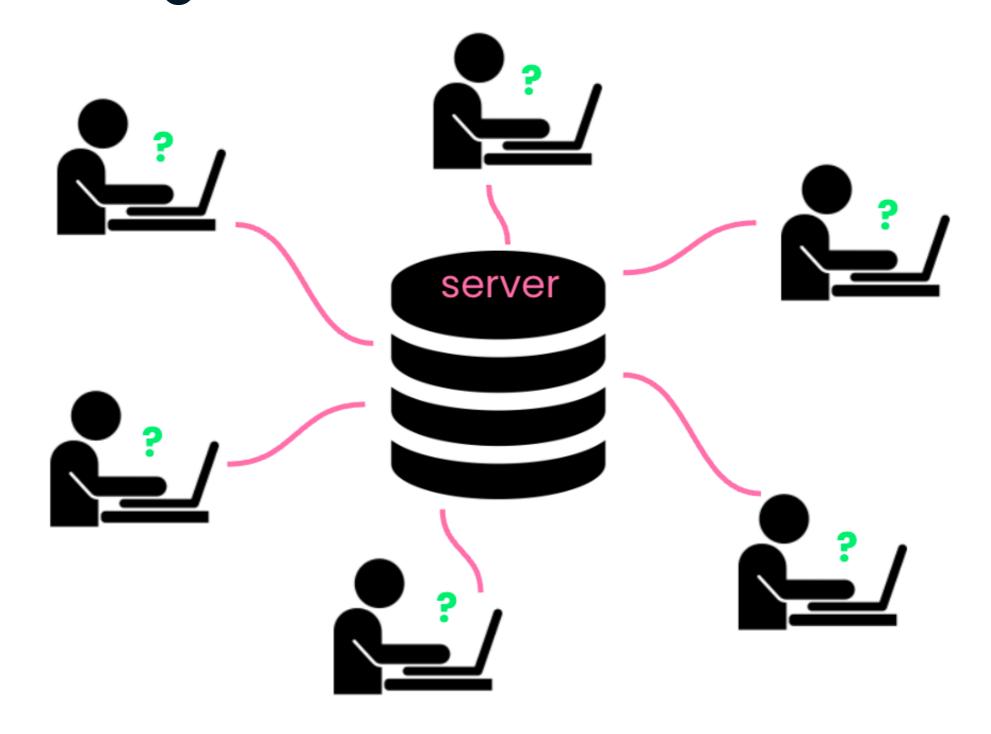

card_num	name	member_year	total_fine
54378	Izzy	2012	9.86
94722	Maham	2020	0
45783	Jasmin	2022	2.05
90123	James	1989	0

- Floats store numbers that include a fractional part
- NUMERIC is a flexible and popular float data type in SQL

Schemas

Database storage
